We are pleased to introduce Animal Studies: Law, Welfare, and Rights as a new collection in HeinOnline. This collection includes more than 800 titles and more than 380,000 pages related to the background and evolution of the basic rights of animals. From philosophical books dating back to the 1800s, to videos, publications, and brochures, Animal Studies: Law, Welfare, and Rights is essential to any researcher looking for a wealth of information on animal law. With titles from the Animal Legal Defense Fund and Animal Welfare Institute, this collection aims to establish the foundational laws pertaining to animals and follow the evolution of these rights throughout the years.
Featured Works:

**Animal Legal Defense Fund**

The Animal Legal Defense Fund was founded in 1979 and has since paved the way for stronger anti-cruelty laws and more humane treatment of animals. The mission of ALDF is to protect the lives and advance the interests of animals through the legal system. They work to file lawsuits to stop animal abuse, provide free legal assistance to prosecutors handling cruelty cases, encourage the federal government to enforce existing animal protection laws, offer public education through seminars and workshops, and work to facilitate the future of animal law through the Student Animal Legal Defense fund chapters and their Animal Law Program.

**Notable Titles:**
- Animals Advocate, 1985-current
- ALDF Update - 17v. (1990-2010)
- Model Animal Protection Laws, 2010
- And More!

**Animal Welfare Institute**

The Animal Welfare Institute was founded in 1951 for the purpose of ending suffering of animals caused by people. The Institute was founded originally to stop the use of animals for experimentation but has since expanded to include all human actions detrimental to endangered species, including fighting the destruction of natural forests containing ancient trees, stopping pollution of the oceans that endanger marine life, and shutting down cruel animal factories that raise and slaughter animals. The AWI works to protect animals by implementing non-animal testing methods and prevention of painful experiments on animals in high schools.

**Notable Titles:**
- AWI Quarterly, 1951-current
- Humane Slaughter Update (Comparing State and Federal Enforcement of Human Slaughter Laws) 2010
- And More!

**Historical Titles**

The intellectual and philosophical roots of contemporary animal rights movements and animal law can be traced to writings as early as those of Xenophon and Aristotle in ancient Greece. Of the cavalcade of thinkers who followed, many addressed issues surrounding the status of animals, and the moral and legal aspects of their treatment by humans. They adopted no common view of these issues; however, they shared an awakening to the necessity of exploring the questions raised by the station of nonhuman beings.

Special Thank You

Numerous librarians and faculty who teach in the area have been instrumental in making this collection a reality. We would, however, be remiss if we did not mention Jennie Meade, Michele Finerty, Tami Gierloff, and Vicki Steiner, librarians who have devoted a considerable amount of time and energy to the development of this collection.
