We are pleased to offer Law in Eastern Europe in HeinOnline. This collection of books, published by Brill, has been digitized for the first time and is now presented in HeinOnline's image-based, fully-searchable, user-friendly interface. This series of more than 60 titles showcases the development, enactment, and impact of the rule of law in Eastern Europe.

In October of 1953 the Law Faculty of the University of Leiden created a Documentation Office for East European Law. The Documentation Office published articles on European Law, accessions lists of books and reviews, and occasionally, legal advice. In 1958 they began a series of publications which focused on Soviet law and Soviet society which would become the Law in Eastern Europe series. The goal of this series was and is to improve the knowledge and understanding of Soviet and Russian law and society. Topics range from copyright to public policy, civil law, freedom of speech, citizenship, and more.

“Established in 1953 for the purpose of gathering and interpreting information about legal developments in socialist countries, the Documentation Office is reputed to have one of the most comprehensive collections of rare and generally inaccessible documents in its area of specialization. This collection attracts researchers around the world. The staff of the Documentation Office is widely known for producing some of the best analytical and statistical reports on legal developments in socialist countries.”
