Academic journals provide a wealth of information regarding law and law-related issues, as well as in-depth analyses of important legal decisions. Unlike other online databases, HeinOnline's Law Journal Library is comprehensive, beginning with the first issue ever published of nearly 2,900 law and law-related periodicals. With more than 39 million pages of articles, comments, notes, book reviews, cases, decisions, and legislation, HeinOnline's Law Journal Library bridges an important research gap.

The Law Journal Library contains legal periodicals covering more than 100 subject areas which are published in sixty different countries, as well as all fifty U.S. states and the District of Columbia. One of the most advantageous features of HeinOnline is that it is an image-based database, which means it provides exact page images as they originally appear in hard copy. Therefore, all charts, graphs, photographs and footnotes appear where they belong!

With a variety of searching options and the integration of Hein's ScholarCheck, More Like This, Topics and Entities, and Venn Diagram Search, database is a welcome addition in any academic setting.

**POPULAR SUBJECTS INCLUDED**

- Criminal Justice
- Political Science
- Technology
- Human Rights
- Business/Economics
- Communications

- International Relations
- Taxation
- Terrorism/Security Issues
- Women and the Law
- Advocacy
- Animal Rights
- Civil Rights
- Foreign Policy
- Intellectual Property
- Religion/Theology
Advanced Search Options

Users have the option to search with the main search bar, or choose the Advanced Search link located beneath it to expand searching options. Search using various metadata fields, such as Text, Article Title, Author/Creator, and more. Within Advanced Search, users can also choose from the **Keyword Search Builder** and **Venn Diagram tools**.

**Keyword Search Builder:**
Enter keywords into one or more boxes and use the boost levels to give more weight to the most important terms in the query.

**NEW Venn Diagram Search:**
Visualize the results yield of various keywords to better refine a search. Utilize the Venn Diagram as a teaching device to help students learn how to structure a search.

Citations in HeinOnline

Users can quickly find an article by using its citation in the Citation Navigator. Click the **Citation** tab on the main search bar, copy/paste a direct citation into the bar, and click search.

To find proper abbreviations, use the Citation Format Guide located under the **Citation** tab option in the main search bar. Use the A-Z index to locate a title, and click either the title or its abbreviation to enter volume and page numbers in the boxes provided.

Citations on pages in HeinOnline are highlighted for easy navigation among related documents. If a citation exists in HeinOnline, the citation is highlighted in blue. Clicking the hyperlink directs the user to the document referenced in the citation.

To access other citations for a specific title, simply click “Cite” next to the Table of Contents at the top of the page.
Hein's ScholarCheck is a series of tools and features in the Law Journal Library and throughout HeinOnline which allow users to view journal articles that have a heavy influence on the subject they are researching. To determine where ScholarCheck tools and features can be used, look for the ScholarCheck icon.

ScholarCheck Features:

• Link to case law powered by Fastcase (only available to HeinOnline Core subscribers)
• Link to articles that cite document being viewed
• Link to documents cited by article, including U.S. Code, Federal Register, Code of Federal Regulations, and Statutes at Large
• Links to external links cited
• Choose to view search results based on number of times cited
• And much more!

Artificial Intelligence Searching

Natural language processing and machine learning tools have been released in the Law Journal Library and select other databases: More Like This, Topics and Entities, and Keyword Search Builder.

More Like This

When viewing an article, the More Like This tool uses a program to pull out “interesting words” as determined by an algorithm. Users are provided with a list of similar articles based on the interesting words. Adjust the boost factors of the interesting words, add a new term, or select a date range to modify the search results.

Topics and Entities

These search facets are found on result pages for searches and More Like This results. The entities include location, person, and organization. These tools enhance a user’s search results to include even more relevant articles by searching the metadata rather than just the document text.
Artificial Intelligence Searching

Keyword Search Builder

The Keyword Search Builder is located within the Advanced Search tool in the Law Journal Library. To use this tool, enter keywords into one or more of the boxes provided. Adjust the weight of each word using the boost factors. Users can also select a title to search within or enter a date range to narrow down the search results.

Indexing of “Not Currently Available” in HeinOnline

HeinOnline indexes the recent issues of several journals whose content is not currently available in the Law Journal Library. By indexing this content, users can search and browse the title, author and abstract information for articles within the volumes that are not yet available in full text within HeinOnline.

For those results where the full-text is not currently available, a light red box will appear and indicate “Full Text Not Currently Available”. Click on the article name to view HeinOnline’s coverage, the publisher’s information, and a link to the publisher’s website. Set up ISSN/ISBN or OpenURL linking through our Branding Program (learn more here: http://home.heinonline.org/branding/) which gives users the ability to find the article or journal within another source in their library other than HeinOnline.

For more information about this collection, including pricing, please contact your sales representative, or contact our Marketing department at marketing@wshein.com or 800-828-7571.
