Introduction to HeinOnline's Democracy in America

Genesis of the project

During the summer of 2017 as I read Tocqueville's *Democracy in America*, I thought it would make for an excellent HeinOnline library. Being able to link to all of the source material Tocqueville had used or cited in writing the book would certainly add another dimension to the experience of reading this classic work. After reaching an agreement with Hein to develop the library after the AALL annual meeting in Austin, Texas, neither party really knew what we would end up with, but it has certainly been an exciting journey.

I am a librarian by profession with a strong background in history and literature. The goal of this project was to create for HeinOnline a digital edition of an English translation of Tocqueville's *Democracy in America*. The digital edition would contain links to as much of the source material that Tocqueville either cited or was known to have consulted. The library would also include various editions and translations of the book, regardless of language, and a range of published scholarship about the book.

In doing the research for the project, I quickly discovered there was a vast amount of published material surrounding the book, not to mention the Tocqueville manuscript materials at Yale University. It soon became evident that the project would need to be divided into several phases, with the initial phase being the digital edition of the book itself. Additional phases encompassing additional materials are planned.

Scope of the Library

Upon release, the library will consist of four main parts. Each is listed and described below:

The Digital Edition

This is the centerpiece of the library. Using the first edition of the English translation prepared by Francis Bowen (Cambridge, Mass.: Sever and Francis, 1862) as the basis of the digital edition, it not only contains the text of the work but also citations and links to specific pages in the source materials used and/or cited by Tocqueville. Cited works, if in a language other than English, include links to English translations when available. If the cited source is in manuscript form, e.g., a letter by Thomas Jefferson, links are included not only to the manuscript, but to a transcription of the letter where available.

Whenever possible, the digital version to which the text is linked is that of a specific edition cited by Tocqueville. In instances where the edition of a work was not clearly identified either by Tocqueville or elsewhere, the digital version is of a resource contemporary to Tocqueville.

Additionally, to supplement the text, extensive editorial notes drawn from several other English translations have been matched to the text of the 'Bowen' edition. These are included as notes in the sources list within the library.

Introduction to HeinOnline's Business and Legal Aspects of Sports and Entertainment

HeinOnline's Business and Legal Aspects of Sports and Entertainment (BLASE) is designed to assist researchers in locating sources relevant to the many issues surrounding these critically important subject areas, both of which have now attained global prominence. Organized into sixteen tabs, each covering a distinct type of material, the database builds upon HeinOnline's historical strengths in legal periodical literature, case law, and U. S. federal and state materials by providing a unique topical arrangement for the documents within each tab while also adding many important new resources not previously available in HeinOnline.

BLASE is edited by Frank Houdek and Ed Edmonds, who both bring decades of work on the literature of sports and entertainment to this enterprise. The foundation of BLASE is the focused topical arrangement created by the editors after their analysis of more than 8,000 periodical articles. The treatment of sports-related material is comprehensive, while the approach to entertainment-related material concentrates on movies, music, television, and theater. Each topic contains a scope note that explains the focus of a given topic and the methodology used by the editors when assigning topics to a particular article. This approach, with some slight modifications, is also used for the material in the remaining fourteen tabs, which cover resources other than scholarly articles. The topic assignment is particularly helpful with the tabs that offer a large selection of books and an extensive bibliography of other relevant publications because it allows users to organize and filter titles by topic in addition to alphabetical or chronological arrangement.

In addition to full-text books and bibliographies with links to WorldCat holdings, the collection also contains federal and state documents, including legislative histories; House and Senate hearings and reports; committee prints; and reports from the Comptroller General, the Congressional Research Service, and the Government Accountability Office. The editors also provide carefully selected lists of court decisions important for researching particular issues in both sports and entertainment. The lists include citations and brief annotations describing the significance of each of the highlighted decisions.

Examples of the many business and legal areas included in the database are antitrust and labor law, athlete and entertainer representation, content regulation, contracts, criminal law, gender and race discrimination, governance, injuries and violence, intellectual property, health and safety issues, and publicity rights. By providing a wide range of materials on these and many other topics, the editors have sought to produce a truly comprehensive treatment of both sports and entertainment.

Additional features include an extensive collection of links to relevant external websites, organized topically; full-text access to the valuable publications of the National Sports Institute of Marquette University; and material pertaining to the Athlete Agents Act organized by annual meetings.

U.S. Presidential Impeachment Library

December 2019

This collection is organized around the four affected presidents, and brings together a variety of documents both contemporaneous and asynchronous to each president's impeachment, presenting both a snapshot of the political climate as each played out and the long view history has taken of past proceedings.

Congressional Research Service reports round out a general discussion of presidential impeachment, and a curated list of scholarly articles, external links, and a bibliography provide avenues for further research on this topic.

We are especially pleased to include the ever-growing resource Whistleblower Complaint on Ukraine, compiled by Kelly Smith at UC San Diego, which brings together official documents related to the whistleblower complaint and impeachment inquiry of Donald Trump.

This library will continue to grow as we add new materials as they become available.

Cataloging Legal Literature

February 2020 | *New Online and Print Edition*

This newly revised edition addresses the needs of large and small law libraries alike, particularly those who wish to follow national cataloging standards, including the Library of Congress and the Program for Cooperative Cataloging.

Cataloging Legal Literature, 5th edition (CLL5) addresses RDA instructions and terminology as found in both the current RDA Toolkit and its Beta Site.

CLL5 is not a general self-help book for the beginning cataloger. The goal is to help the law cataloger deal with the ambiguities of 21st century cataloging.

Throughout the manual, illustrations of descriptive or subject cataloging and MARC tags are offered. The examples of subject cataloging are based on guidelines published in the Library of Congress' Subject Cataloging Manual (SCM) and identifying Library of Congress practices for assigning subject headings.

This title must be used in conjunction with RDA, LCSH, SHM, and general handbooks on descriptive and subject cataloging.

Cataloging Legal Literature

February 2020 | *New Online and Print Edition*

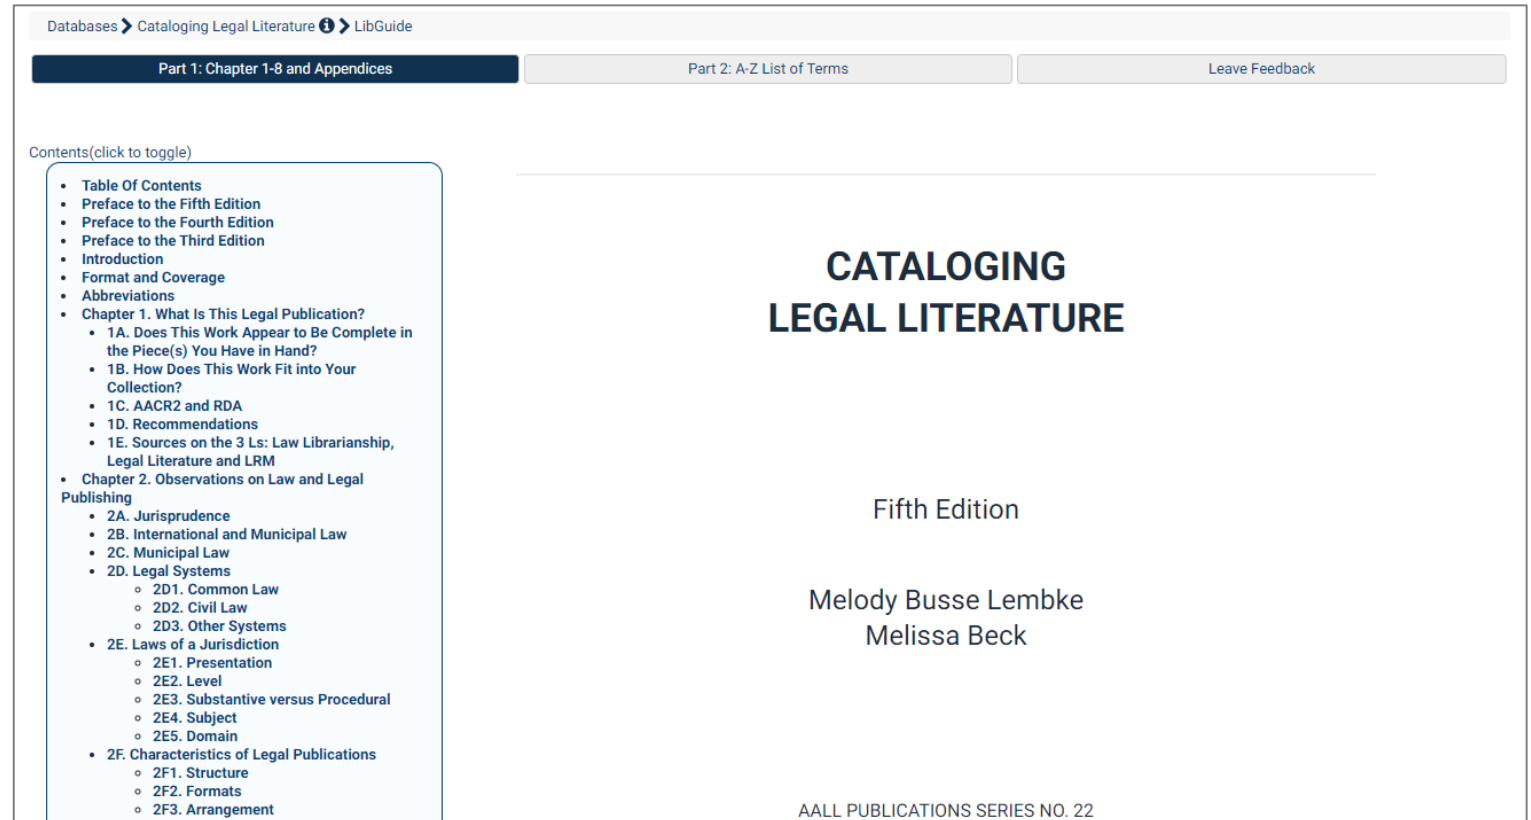

In addition to print, CLL5 is available in digital format as a searchable resource.

Part 1 includes hyperlinks to:

- Cataloging resources
- Extensive MARC examples
- Charts

Part 2 of CLL5 contains an alphabetical listing of more than 220 legal terms and publication formats. These terms will link users to:

- RDA instructions
- Subject practice
- Classification information
- Cataloging examples

Introduction to HeinOnline's Criminal Justice & Criminology

Most of us in the United States have some superficial understanding of our criminal justice system thanks to popular culture. America reveres its outlaws almost as much as it does its lawmen, and counts among its immortals Wyatt Earp, Al Capone, Bonnie and Clyde, and Eliot Ness. While the old adage may suggest that crime doesn't pay, it certainly is profitable. Of the top ten longest-running scripted U.S. primetime television series of all time, five are centered around crime and the dispensing of justice (*Law & Order: Special Victims Unit*, *Gunsmoke*, *Law & Order*, *NCIS*, and *CSI: Crime Scene Investigation*). Our society is fascinated, almost obsessed, with crime.

The easy narratives of television, however, do not always play out in the courtroom, and while a viewer might think an episode of *Cops* captures the reality of the criminal justice system, it only shows a small portion of the entire apparatus. **Criminal justice** refers to the system by which justice is dispensed onto those who have committed a crime. It includes the crime a defendant allegedly committed, the law enforcement officers who arrested him, the court system that prosecutes and defends him, and how the defendant is punished if he is convicted. Throughout history the basic elements of the criminal justice system have existed in some form or another, although the mechanisms by which they are expressed have changed through the centuries. For example, while exile and branding have fallen out as popular (and acceptable) methods of punishment for criminals, imprisonment and parole have risen up to take their place. Codification of laws and their respective punishments have existed back to the ancient Code of Hammurabi, but our conception of modern policing traces its origin London's Metropolitan Police Force, created by Sir Robert Peel in 1829.

Criminology, on the other hand, is the study of criminal behavior on both an individual and societal level. It intersects with the criminal justice system by studying, for example, the effectiveness of certain types of punishment or the causation of crime and the

Introduction to HeinOnline's Bibliography of American Law School Casebooks

In 1871, at Harvard Law School, Christopher Columbus Langdell introduced what would come to be known as the "case method" of legal instruction whereby law students would read a selection of cases in order to comprehend the guiding legal principles. For over 133 years, the case method has continued to spread and evolve, and today, some form of it is used in every law school in the United States and casebooks remain the primary vehicle of legal education. Although much has been written on the analysis of the case method and the evolution of the content of casebooks, there is a dearth of bibliographic information on the items themselves, and no attempt has been made to identify all of the law school casebooks produced. This bibliography is intended to fill that small but important niche in American legal bibliography by presenting as comprehensive as possible a list of those casebooks intended for use in law schools and published in the United States from their inception in 1871.

This database is derived from the print works *Bibliography of American Law School Casebooks, 1870-2004* and *Bibliography of American Law School Casebooks, 1870-2018*. Much has changed in the landscape of law school casebook publishing since the publication of the first edition, which covered titles published from 1870-2004. However, despite predictions of their imminent demise, print casebooks have persisted. In an age of preference for, and seemingly immediate access to, information in a digital format, it is surprising that new editions are being produced at a faster rate than ever before, and although digital and open-source titles have made inroads, they are not replacing print. As a matter of fact, the number of print titles has increased an average of 23% per decade for the last 40 years.

Since the first volume, the market has consolidated into three main casebook publishers: West Academic Publishing, Carolina Academic Press, and Wolters Kluwer. Carolina Academic Press has recently taken over all of the law school print publishing of LexisNexis, Matthew Bender titles. Wolters Kluwer has expanded its academic titles, which includes the Aspen Casebook Series, to include more than 400 textbooks. West Publishing, which was acquired by Thompson Reuters in 1997, continued to produce their casebook titles until 2013, when West sold its academic publishing arm, including the American Casebook Series and the Foundation Press's University Casebook Series, to Eureka Growth Capital. This newly branded West Academic Publishing was sold again, in 2019, to Levine Leichtman Capital Partners. Although these publishers all offer digital editions of most of their titles, time will tell in what direction they will attempt to move the casebook market.

As mentioned above, new editions of casebooks have begun appearing at a faster rate than ever before. In part, this has been to address the changing nature of the law, but presumably also to counter the second-hand book market—thus ensuring a never-ending supply of new customers. Additionally, the content of the casebook has changed over the years. The days of Langdell's collection of cases with little explanatory text are gone. Law professors have begun writing treatise-like "casebooks" containing few actual cases, and publishers have increasingly been marketing traditional academic titles to a broader audience to include practitioners and scholars. As a result, the definition of "casebook" has become increasingly murky, thus making the upkeep of this bibliography even more difficult. Although the casebook as we currently know it will likely change in the coming years, this bibliography demonstrates that it remains a mainstay of legal education.

Methodology

When selecting entries for this work, the first concern was to define "casebook." Today these items can readily be identified, usually through their bindings or series designation. The problem lies in the fact that there is no Library of Congress Subject Heading covering these items specifically (casebooks simply receive the subject descriptor for the topic of the work's content), so identifying those titles not included in a publisher's casebook series required trolling through thousands of print and electronic catalog entries and the handling of hundreds of books with an eye toward the title, author's affiliation, and statements made in the introductory materials. Adding to the difficulty in identifying early casebooks was the fact that at the turn of the twentieth century there were many "casebooks" available that were collections of leading cases on a topic, but were produced for attorneys to aid in the practice of law. Because the intent of this bibliography is to provide a list of those casebooks intended for instructional use in law schools, every attempt has been made to omit titles clearly not intended for classroom use.
