

World Treaty Library

HeinOnline has changed treaty research forever.

Over the past few decades, various efforts have been put forth to create a universal collection of all the treaties of the world. This monumental database brings together works from Rohn, Dumont, Wiktor, and Martens to create the richest collection of world treaties ever available, spanning from 1648 to the present. More than **180,000 treaty records** have been identified.

Through in-depth indexing of all treaties and cross-citation linking, this unique database is a powerhouse search tool. Easily locate treaties using fields such as keyword, country, treaty number, treaty type, party, subject, and many more!
