

# Be a Pathfinder for Hein's Legal Research Guides

For years, William S. Hein & Co., Inc. has published a series of Legal Research Guides. The pathfinders we include in the series are generally guides written by law librarians in response to their users' needs or top papers from Advanced Legal Research classes. These guides are usually short (often 40 to 125 pages) and provide an annotated starting point for someone interested in finding more information on a particular topic in legal research. Following you'll find sample table of contents to illustrate possible structures.

## Keep Us in Mind

Please keep us in mind when a librarian or student produces an exceptional research guide. If accepted into the Legal Research Guide series, we will pay the author a small royalty. We also ask that the librarian or instructor provide a brief but substantive foreword to be published with the book.
